ALTF4

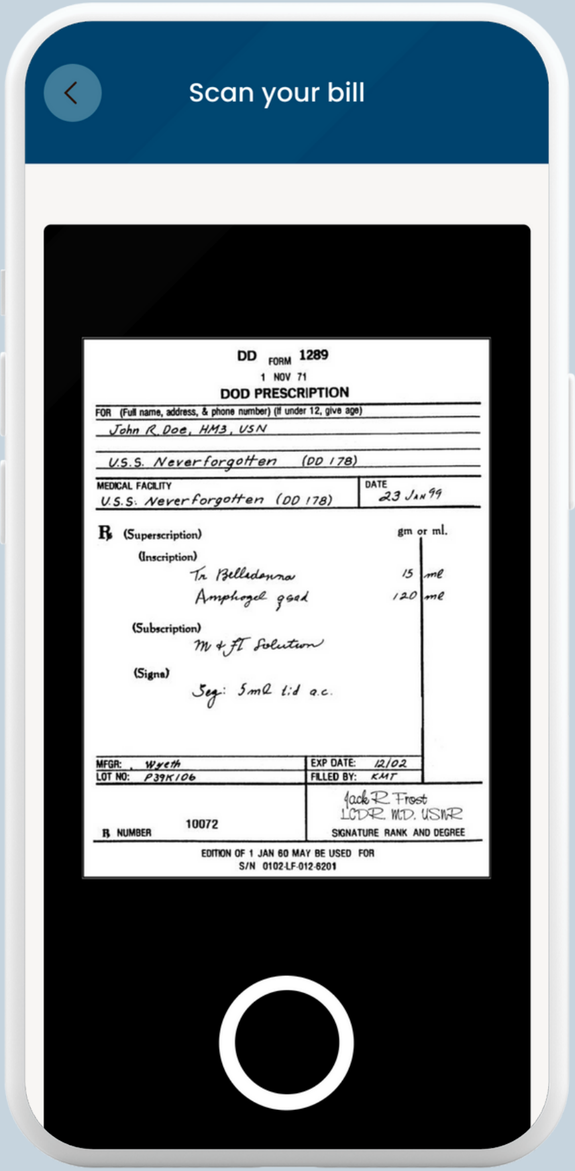
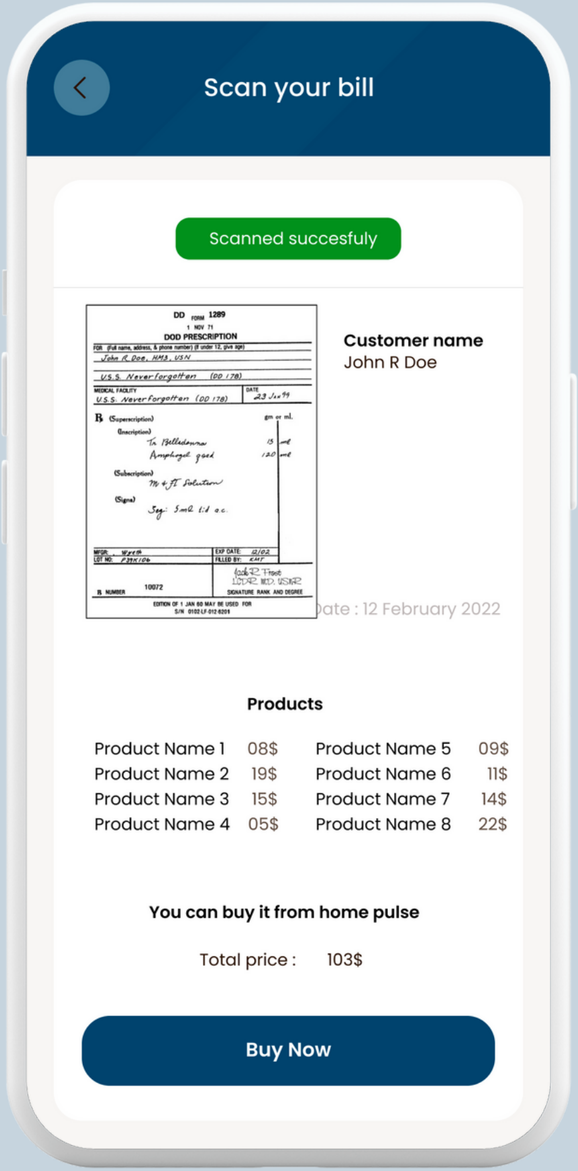
Perscription Scanner

- Automatically scan your perscription and create your order
- User intuitive and fast checkout in two steps





ALTF4

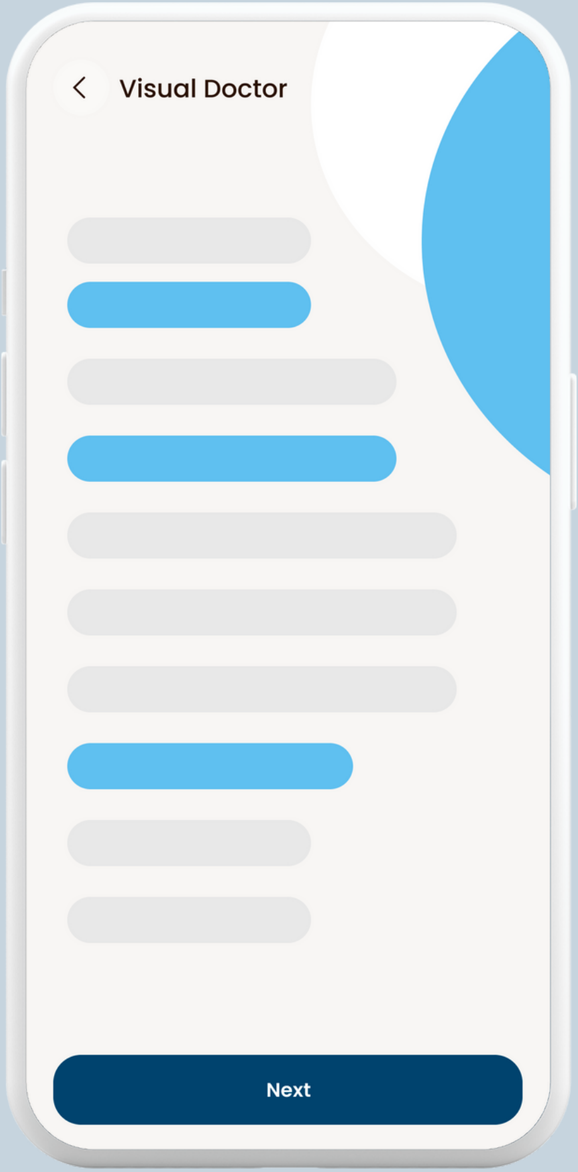
Shopping screen

- Recommended product based on wearable data like APPLE HEALTH
- Explore more medication with easy to buy option
- Option to buy other healthcare/skincare products or vitamins

ALTF4

AI Specialist

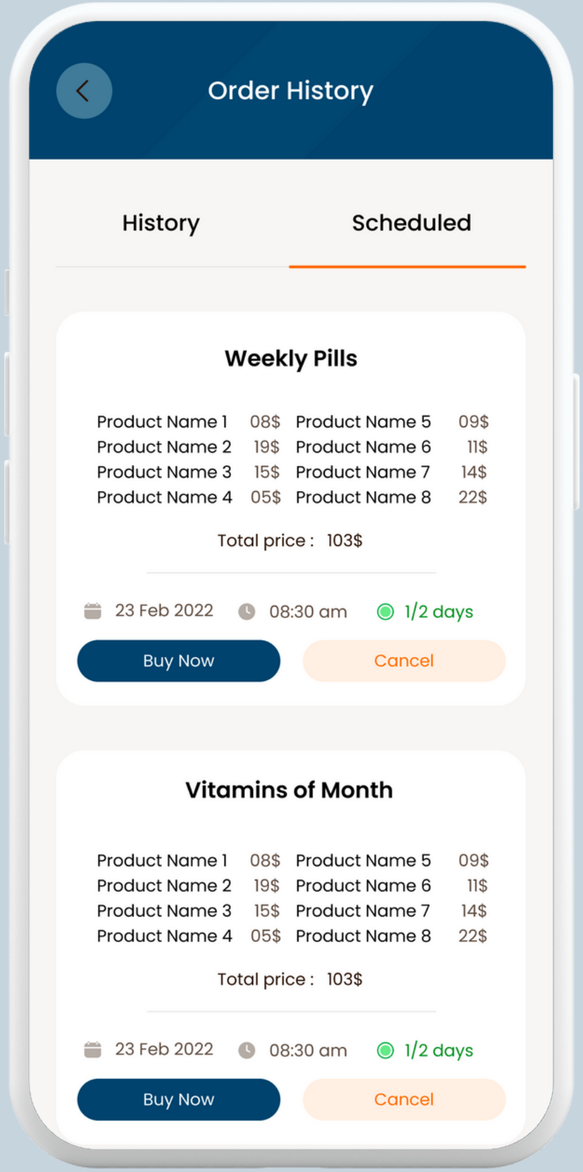
- FAQ questions answered by an AI bot
- Product-related questions answered by the AI chat bot
- If anything complex is needed a human physician can intervene



ALTF4

Subscription-based orders

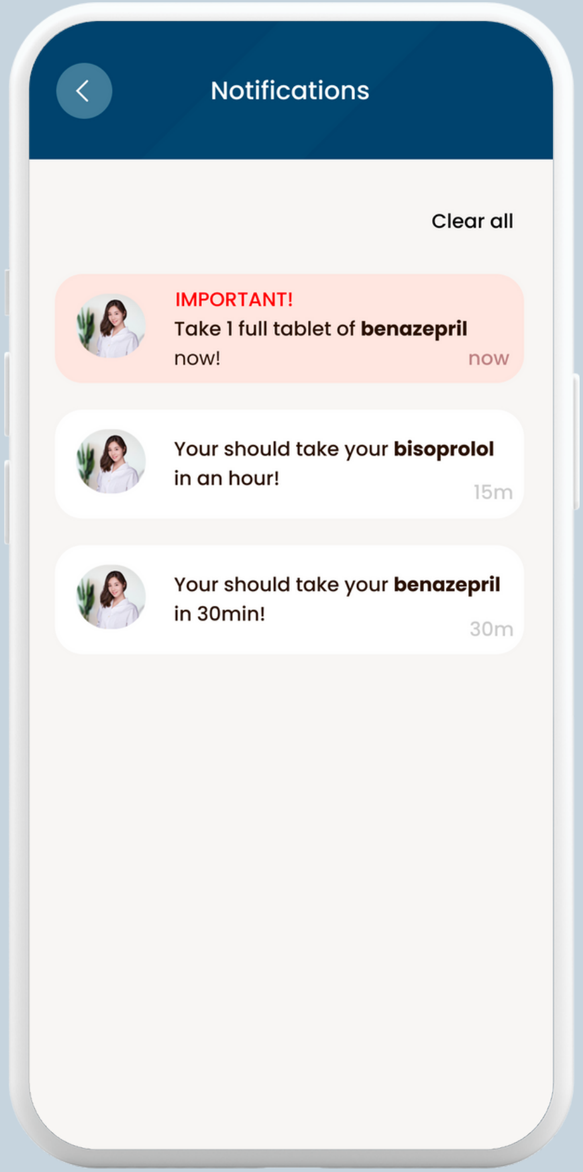
- Medication subscriptions are automatically billed and delivered regularly.
- Patients can easily modify their orders to change medication, dosage, or delivery frequency.
- Subscriptions ensure regular medication delivery, convenience, and adherence.



ALTF4

Reminders

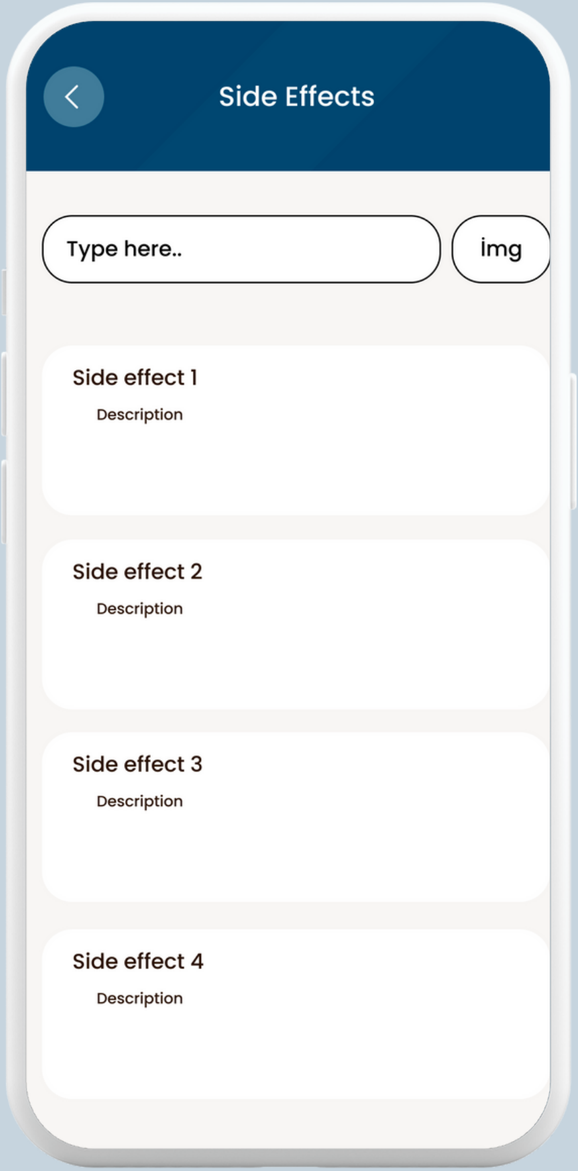
- Reminder tools improve medication adherence by helping patients remember to take their medication.
- Tracking usage to ensure medication is taken properly and refill when needed



ALTF4

Side-effects

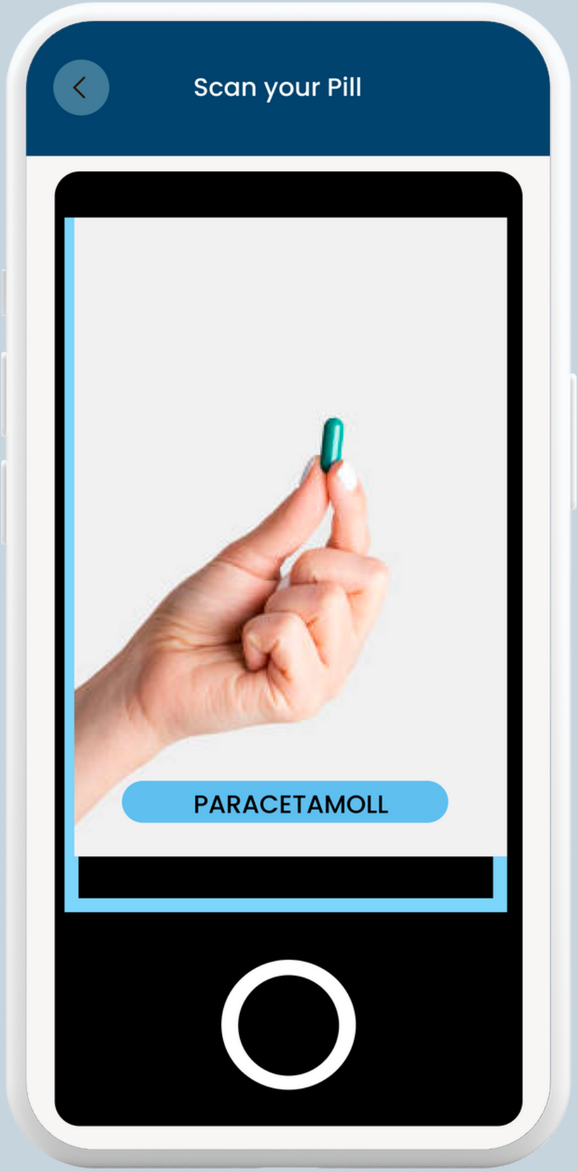
- The side-effects directory provides information about potential side-effects of medications, including their frequency and severity.
- Guides with recommendations on how to manage the side-effects
- Allergy alerts



ALTF4

Scan your pill

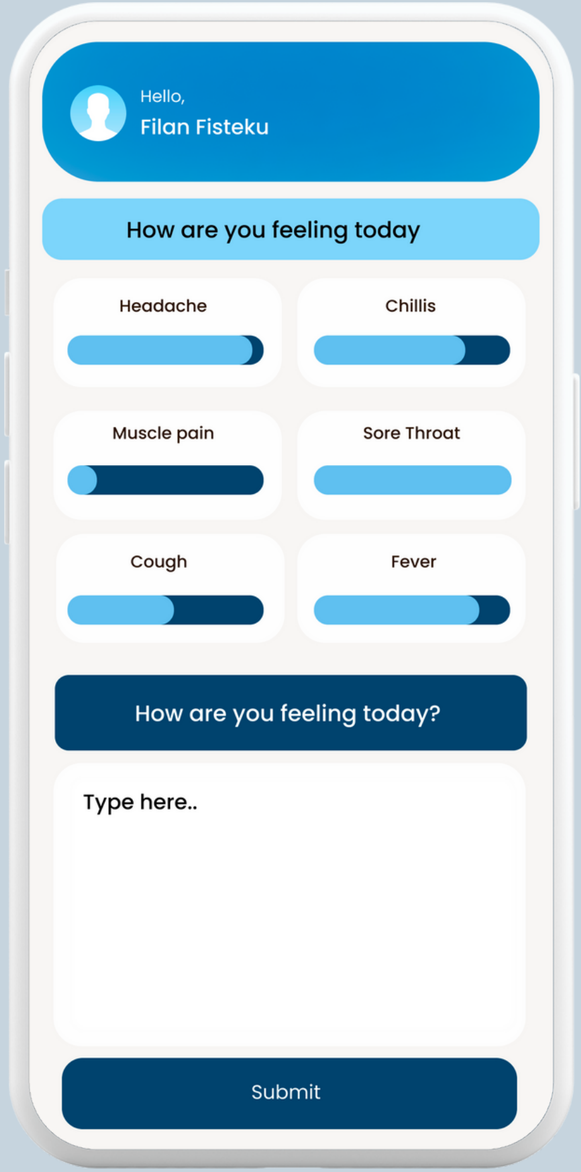
- Identify pills and their usage
- Get direct information about them



ALTF4

How are you feeling today?

- Health quizzes and assessments: A feature that allows users to take health quizzes and assessments to better understand their health and identify potential health risks.



Why this approach?

- Enhance workflows
- Optimize systems
- Grow into new markets

- Improve patient outcomes
- Increase profits
- Lower costs

The team in need of a watch
